Professional Experience

OpenSource Game Project   São José, SC, Brazil
IFSC - Federal Institute of Santa Catarina   Jan 2024 - Aug 2024

- Contributed to the ideation, development, and programming of a web game in JavaScript using the Phaser library to build game logic and elements. Also created pixel-art assets and the visual design of the game. Implemented multiplayer functionalities with cloud support, enabling simultaneous player interaction.

Telecommunications Intern   São José, SC, Brazil
YamaTech   Mar 2024 - Jun 2024

- Assisted in the installation and maintenance of telephone and internet networks, as well as in the analysis and troubleshooting of communication infrastructure and hardware.

Projects

To/Do List   nicolas4pitz/meta-project-react-javascript
Developer   Sep 2024 - Sep 2024

- Developed a back-end application in Node.js, applying REST API concepts, using TypeScript, Fastify as the framework, integration with DrizzleORM + PostgreSQL, Docker, and Zod for data validation. Created a front-end application in ReactJS, applying concepts of props, state, and components, using TypeScript typing, Vite tooling, responsive interface with TailwindCSS, Node.js API consumption, and asynchronous data management with TanStack Query.

Netflix Clone   nicolas4pitz/netflix
Developer   Feb 2024 - Aug 2024

- Developed a "Netflix" clone website using HTML5, CSS3, and JavaScript. Applied visual design concepts such as glassmorphism to enhance site aesthetics.

Skills

Languages	**JavaScript**, **Python**, **TypeScript**
